

TCS CodeVita Season 13

Programming languages and Compilers

The following is a list of programming languages and their requisite compilers/interpreters allowed in TCS CodeVita competition. You are advised to download them in advance and familiarise yourself with its UI and functionalities.

Language	File extension	Version	URL
Java 8	.java	Open jdk 8	https://openjdk.java.net/install/
C	.c	gcc 9.3.0	https://ftp.gnu.org/gnu/gcc/gcc-9.3.0/
C++	.cpp	g++ 9.3.0	https://ftp.gnu.org/gnu/gcc/gcc-9.3.0/
C#	.cs	mono 6.12.0.122	https://www.mono-project.com/download/stable/
Node.js	.js	Node.js v22.15.1	https://nodejs.org/download/release/v22.15.1/
Perl	.pl	5.30.0	Interpreter : http://www.activestate.com/activeperl/downloads

Language	File extension	Version	URL
			IDE : http://www.epic-ide.org/download.php
Python 3	.py	3.8.10	Interpreter : http://sourceforge.net/projects/pydev/ IDE Plugin : http://pydev.org/manual_101_install.html User Manual : https://developers.google.com/appengine/docs/java/tools/eclipse
Ruby	.rb	3.1.4	Compiler : https://www.ruby-lang.org/en/downloads/
PHP	.php	7.4.3	Manual for Plugin: https://www.eclipse.org/pdt/

It is advised to set up your local environment much before the contest so that you get accustomed to it. Match your language compilers and/or interpreters with the supported versions as mentioned.

Thank You and Happy Coding!

Best Regards,

Team TCS CodeVita
